Office Action Summary		

Art Unit: 1642

DETAILED ACTION

1. Applicant's election of Group I (claims 1-23) in Paper No. 6/A is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Applicant's amendment filed December 15, 2001 (Paper No:6/A) are acknowledged.

Accordingly, claims 24-63 are canceled without prejudice.

Claims 1-23 are being examined.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. Claims 1, 13 are indefinite in their recitation of "receptor activity" as the metes and bound of the term are not clear. Claims are also unclear as to "receptor expression" as it is uncertain whether "expression" relates to the expression of the gene encoding the receptor or to a change in the number of receptors.

OK B. Claims 17 is ambiguous in the recitation of "analogs and derivatives" as it is not clear what the differences are between them. Page 49 of the specification indicates in terms of the definitions that these molecules can be the same and that they are protein molecules.

C. Claim 1 recites in the preamble "receptor mediated process", the method steps outline "measuring the α 2M receptor activity" by contacting hsp and α 2M receptor with the test

Art Unit: 1642

compound. It is not clear how the receptor activity or receptor expression can be measured. It appears that at best the claimed method is drawn to determining the change in the binding of hsp and α 2M receptor by the test compound.

D. Claim 14 is indefinite in its recitation of "ability to interact with hsp" because it is not clear the ability of what is being measured, as well as the metes and bound of "interact". Amending the claim to indicate that the the ability of the receptor to bind to the hsp is intended, and perhaps consider replacing "interact" with "bind" may obviate the rejection.

5. No claims are allowed. Claims are free of the art.

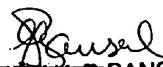

6. Papers related to this application may be submitted to Group 1640 by facsimile transmission. Papers should be faxed to Group 1640 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 308-4242 or (703) 305-3014.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Geetha P. Bansal whose telephone number is (703) 305-3955. The examiner can normally be reached on Mondays to Thursdays from 7:00am to 4:30pm and alternate Fridays from 7:00am to 3:30pm. A message may be left on the examiner's voice mail service.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Anthony Caputa, can be reached on (703) 308- 3995.

8. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
